16. Abstracts

This report presents population and land use projections prepared for the Areawide Waste Treatment Management Plan for the Greater Houston Area pursuant to P.L. 92-500, Section 208. The population and land use projections in this report represent a present estimate of probably future conditions, and as such must be continually monitored and updated to reflect actual development and changes in growth patterns.

The study area, as designated by the Governor for this program, includes all of Harris County and parts of five adjacent counties including Brazoria, Fort Bend, Waller, Galveston and Montgomery Counties.

AREAWIDE WASTE TREATMENT MANAGEMENT PLAN
FOR THE
GREATER HOUSTON AREA
(SECTION 208, P.L. 92-500)

DECEMBER 1977

PREPARED BY THE HOUSTON-GALVESTON AREA COUNCIL

DESIGNATED 208 AREA

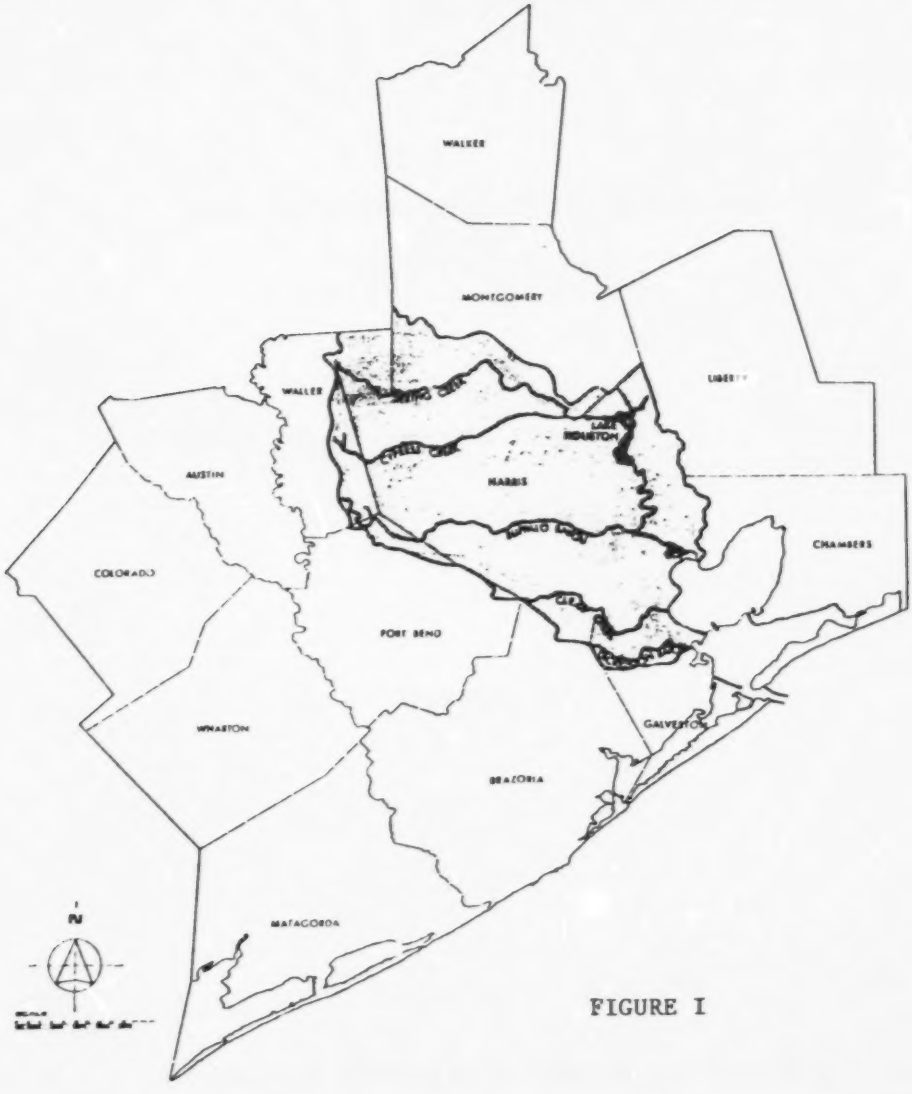

FIGURE I

INTRODUCTION

The Houston-Galveston Area Council (H-GAC) has been designated by the Governor of the State of Texas as the planning agency to develop a comprehensive areawide waste treatment management plan for the Greater Houston Area. A grant of $1.8 million from the U.S. Environmental Protection Agency (EPA) has been made to the H-GAC under the provisions of the Federal Water Pollution Control Act Amendments of 1972 (P.L. 92-500). Section 208 of that law allocated planning funds for areas experiencing substantial water quality problems due to urbanization and industrial concentration. The planning program is directed toward the attainment, where feasible, of the 1983 national goal to render all streams suitable for fishing and swimming.

The study area, as designated by the Governor for this program, includes all of Harris County and parts of five adjacent counties including Brazoria, Fort Bend, Waller, Galveston, and Montgomery Counties (Figure 1).

The initial Section 208 planning program is scheduled for completion in April 1978. The plan will include both technical and management proposals for the attainment of water quality goals. Section 208 plans will become part of a continuing planning process and are required to be updated annually.

The following report presents population and land use projections prepared for the Areawide Waste Treatment Management Plan for the Greater Houston Area pursuant to P.L. 92-500, Section 208. The population and land use projections in this report represent a present estimate of probable future conditions, and as such must be continually monitored and updated to reflect actual development and changes in growth patterns.

The Houston-Galveston Area Council maintains an on-going program of research and data collection related to the distributions of people, land use, and employment in the 13-county Gulf Coast State Planning Region. This program responsibility will continue to monitor growth and change in the region and along with local input will assist in the provision of regular updates to the data presented in this report.

POPULATION AND LAND USE

Land use and population studies form the foundation for all planning activities. The provision of public services such as sewers, roads, and schools must be planned in advance to accommodate growth in an orderly fashion. The planning of these services is generally

based on forecasts of population growth and distribution.

Although the current population and land use projections have been performed as input to the 208 planning effort, the results will be used for the planning of future wastewater treatment facilities (Section 201 planning) and will also be used in planning programs in transportation, air quality, community development, and coastal management.

In the 208 Program, estimates of existing and projected population, employment, and land use serve as a basis for projecting patterns of pollution from urban stormwater runoff and the distribution of point source wasteloads and flows. Population and land use characteristics are utilized in the establishment of domestic sewage treatment service area boundaries.

The data presented on the following pages reflect a joint effort between H-GAC and local governments. For those census tracts within the City of Houston, the projections are those developed by the City for a wastewater treatment improvement program being developed under Section 201 (P.L. 92-500). Population and land use projections for census tracts outside the City of Houston were determined by a methodology which allocates shares of projected total county growth based on past attractiveness, available land, and anticipated density of development. A detailed description of this methodology can be found in the Project Design Report, Areawide Waste Treatment Management Plan for the Greater Houston Area. Projected growth for individual counties was developed from An Economic Base Analysis of The Gulf Coast State Planning Region, December 1974, prepared for H-GAC by the Bureau of Business Research, University of Texas at Austin.

Table 1 presents 1975 estimates and projections of population by five-year intervals to 1995. Estimates are provided for each census tract within the designated 208 planning area. A map (Figure 2) of the census tracts has been included at the back of the report.

Table 2 presents land use (in acres) for 1975, and selected years through 1995. Land uses were tabulated by the following categories:

- Single-Family Residential including duplexes.
- Multiple-Family Residential including apartments, boarding houses, mobile home parks, condominiums.
- Commercial and Services including retail and wholesale trade, personal services, business activities and offices, hospitals and medical facilities, communication and amusement facilities.
- Industrial including light and heavy manufacturing, port and terminal facilities, utility plants and substations,

sewage treatment facilities and solid waste disposal sites, mineral extraction activities, refineries, airports (only the physical facilities on the airport property are designated), warehousing.

- Parks and Open Space including areas generally reserved from urban development such as city and county parks and recreational facilities, golf courses, cemeteries, zoos, wildlife refuges, protected floodways, easements, greenbelts.
- Agricultural including lands used for crops, pastures, orchards, groves, vineyards, feedlots.
- Vacant Land including areas not in current use which may be available for development, primarily within urban areas, but including rural and suburban areas where it is evident land is not being used for agricultural or other purposes.
- Other includes land used for Right of Way (R), Water (W), and Resource Production (P).
- In census tracts outside Harris County the vacant and agricultural categories are totaled and reported as undeveloped.

Data Sources for this work include:

- Population, Households and Dwelling Units in Harris County Census Tracts, January 1, 1976, Houston Chamber of Commerce, Research Division
- 1970 to 1990 Population and Land Use, July 1974, Houston-Galveston Regional Transportation Study
- An Economic Base Analysis of the Gulf Coast State Planning Region, December 1976, H-GAC
- U.S. Bureau of the Census
- City of Houston, Department of Public Works, Wastewater Division
- Aerial Photographs Flown in September 1975 by the State Department of Highways and Public Transportation
- Land Use Patterns in Houston, Turner, Collie and Braden, Inc., February 1976
